Nowadays people got on a more new level compared to previous generations. That means now people's life become way easier. We have smartphones which can replace lots of tools and help us solve many problems. They can help us communicate and find new friends. List of phones' advantages can be led for long time. However, our generation got way more ~~more~~ 18 other people and also people live in make us all spend our free time uselessly.

In 19th century, people humans couldn't have free time very often, because of having to much work to be done. Nonetheless, in their freetime they were also getting lots of profit. For instance, they were reading lots of literature which was providing them with great vocabulary. They were playing many games, one side which was good for their health. They were not ~~it did not~~ have any bad habits as smoking and drinking. On the other hand, there are young people of our time. They spend almost all their free time on social media which affects their vision, and doesn't evolve their brains ~~so that~~ it is not possible to talk to them longer than for five minutes. They also find interesting and cool drinking alcohol and smoking cigarettes, which does not require any explanation how bad and harmful it is.

In conclusion, I have to say that there are also lots of young people who spend their time ~~not~~ usefully, ~~not~~ consuming lots of information from internet and so on. TV I advice every one to be like these good teenagers, read lots of literature, do sports and never get on bad habits.
