The problems with protecting wild life in our country are actually. Every day in social media, news TV we hear about wildlife. I think that ordinary people should help to protect wildlife in our country. They can open the special course for support wildlife. In this course wildlife can get a lot of knowledge. Also ordinary people take to help to protect wildlife in our country with charity, and developing social media like Instagram, Facebook, because community resonance is a big power. In social media a lot of people can see the problems and solve it. In my opinion people should understand that everyone has chance change mistakes to life. Every people must understand that without wildlife, the health of people fall down, because wildlife give us a fresh oxygen. To save wildlife in our country is a big mission. I think that my steps which I supported can protect our wildlife.
